

Vigil Neuroscience to Present at Stifel 2024 Virtual CNS Days

Mar 12, 2024

WATERTOWN, Mass., March 12, 2024 (GLOBE NEWSWIRE) -- [Vigil Neuroscience, Inc.](#) (Nasdaq: VIGL), a clinical-stage biotechnology company committed to harnessing the power of microglia for the treatment of neurodegenerative diseases, today announced that Ivana Magovčević-Liebisch, Ph.D., J.D., President will participate in a fireside chat at the Stifel 2024 Virtual CNS Days on Tuesday, March 19th at 3:30 p.m. E.T.

To register for the live event, please [click here](#). The webcast will also be available on the Company's website on the "[Events & Presentations](#)" page in the "Investors" section. An archived webcast will be available for approximately 90 days following the presentation.

About Vigil Neuroscience

Vigil Neuroscience is a clinical-stage biotechnology company focused on developing treatments for both rare and common neurodegenerative diseases by restoring the vigilance of microglia, the sentinel immune cells of the brain. Vigil is utilizing the tools of modern neuroscience drug development across multiple therapeutic modalities in its efforts to develop precision-based therapies to improve the lives of patients and their families. Iluzanebart, Vigil's lead clinical candidate, is a fully human monoclonal antibody agonist targeting human triggering receptor expressed on myeloid cells 2 (TREM2) in people with adult-onset leukoencephalopathy with axonal spheroids and pigmented glia (ALSP), a rare and fatal neurodegenerative disease. Vigil is also developing VG-3927, a novel small molecule TREM2 agonist, to treat common neurodegenerative diseases associated with microglial dysfunction, with an initial focus on Alzheimer's disease (AD) in genetically defined subpopulations.

Internet Posting of Information
